Chapter 4 Types of Data
Models Adrienne Watt &
Nelson Eng. High-level
Conceptual Data Models. High-
level conceptual data models
provide concepts for
presenting data in ways that

Bookmark File PDF Chapter 4 Data Modeling

are close to the way people perceive data. A typical example is the entity relationship model, which uses main concepts like entities, attributes and relationships.

Chapter 4. Data modeling
This chapter covers. What is
a data model? How to convert
tabular data to graph data
What about graph databases?

Bookmark File PDF Chapter 4 Data Modeling

What about other key-value stores? I hope that the first few chapters have convinced you of the value of graphs, but most data isn't conveniently organized into nodes and links.
