class-8 The Nervous System, Part
1: Crash Course A\u0026P #8

Chapter 9 The Endocrine System

The nervous system connects
directly to target cells and organs,
while the endocrine system uses
hormones and chemical signals to
send messages to target cells and
organs. c. The nervous system
controls muscle contraction,
automatic responses, and
voluntary actions, while the
endocrine system uses hormones

Broken glass and immediately pull your foot back. Why is it important that the signal triggering this motion come from the nervous system and not from the endocrine system?

Chapter 9 The Endocrine System -
Chapter 9 The Endocrine ...

In the pituitary, then, cells of the central nervous system and the endocrine system meet and live as near neighbors. The endocrine system is highly complex, and its organs are many and varied. Some endocrine organs, such as the Ovary and Testis, have already been discussed. In this chapter, several of the major endocrine organs are illustrated by light and electron microscopy - the thyroid gland, the adrenal
