Among the many writers who lent their talents to the creation of hard-boiled detective fiction, few have approached it from a more original perspective than Chester Himes. A former criminal himself, Himes brought to the writing of detective fiction the perspective of the black man. Himes made his debut with the brilliant *For Love of Imabelle*, for which he was awarded the coveted Grand Prix de la Littérature Policière. *Two Guns from Harlem* probes Himes's early life and career for the roots of this series and for its heroes, Coffin Ed Johnson and Grave Digger Jones. Skinner discusses how Himes's experience as a black man, combined with his unique outlook on sociology, politics, violence, sex, and race relations, resulted not only in an unusual portrait of black America but also opened the way for the creation of the ethnic and female hard-boiled detectives who followed.

Mastering Financial Accounting Essentials is a text for people who need to use accounting information in their everyday jobs. They need to be able to understand the language and the law in order to talk to accountants and clients in an intellectual manner. Part One of the book uses an extended scenario to present the basics of financial accounting. McCrary creates a new business from scratch. By the end of the scenario (and the end of Part 1), readers will have reinvented double-entry book keeping. Along the way, readers can delve as deeply as they wish to learn more about inventory valuation methods (for example, LIFO verse FIFO) and the timing of erosion of the productive assets (for example, straight line depreciation verses double declining balance). As before, McCrary will emphasize a general understanding of the process and the reports. Part Two will use financial statements. Using the extended scenario above, McCrary shows how internal managers calculate ratios and trends to evaluate business efficiency. McCrary shows how bankers will review the statements to determine solvency.
