

## Honda Vtec Engine Specs

Thank you very much for reading **honda vtec engine specs**. As you may know, people have search numerous times for their chosen readings like this honda vtec engine specs, but end up in harmful downloads. Rather than enjoying a good book with a cup of coffee in the afternoon, instead they are facing with some harmful virus inside their laptop.

honda vtec engine specs is available in our book collection an online access to it is set as public so you can get it instantly. Our book servers saves in multiple countries, allowing you to get the most less latency time to download any of our books like this one. Kindly say, the honda vtec engine specs is universally compatible with any devices to read

The engine block is covered with the DOHC VTEC head. This was the first Honda engine with a VTEC system. The diameter of intake valve was 33 mm, of exhaust valves - 28 mm, valve stem diameter was 5.5 mm. Camshafts were rotated by the timing belt to be replaced after every 60,000 miles (100,000 km) of travel.

Honda B16A engine (B16B) | Specifications, features, tuning  
VTEC is a system developed by Honda to improve the volumetric efficiency of a four-stroke internal combustion engine, resulting in higher performance at high RPM, and lower fuel consumption at low RPM. The VTEC system uses two camshaft profiles and hydraulically selects between profiles. It was invented by Honda engineer Ikuo Kajitani. It is distinctly different from standard VVT systems which change only the valve timings and do not change the camshaft profile or valve lift in any way.
