Call an External JavaScript File You can also place JavaScript in its own file and name it inside your HTML. That way, you can keep different types of code separate from one another, making for better-organized files. If your code is in a file called myscript.js, you would call it:

JavaScript Cheat Sheet for 2020 (.PDF Version Included ...

The JavaScript language Here we learn JavaScript, starting from scratch and go on to advanced concepts like OOP. We concentrate on the language itself here, with the minimum of environment-specific notes.

The Modern JavaScript Tutorial

JavaScript has several top-level, built-in functions: eval() The eval() method evaluates JavaScript code represented as a string. uneval() The uneval() method creates a string representation of the source code of an Object. isFinite() The global isFinite() function determines whether the passed value is a finite number. If needed, the parameter ...

Functions - JavaScript | MDN

This chapter discusses JavaScript's basic grammar, variable declarations, data types and literals. Basics. JavaScript borrows most of its syntax from Java, C, and C++, but it has also been influenced by Awk, Perl, and Python. JavaScript is case-sensitive and uses the Unicode character set. For example, the word Früh (which means "early" in German) could be used as a variable name.

Grammar and types - JavaScript | MDN

JavaScript (JS) is a lightweight, interpreted, or just-in-time compiled programming language with first-class functions. While it is most well-known as the scripting language for Web pages, many non-browser environments also use it, such as Node.js, Apache CouchDB and Adobe Acrobat. JavaScript is a prototype-based, multi-paradigm, single-threaded, dynamic language, supporting object-oriented, imperative, and declarative (e.g. functional programming) styles.

JavaScript | MDN

The official guide assumes intermediate level knowledge of HTML, CSS, and JavaScript. If you are totally new to frontend development, it might not be the best idea to jump right into a framework as your first step - grasp the basics then come back! Prior experience with other frameworks helps, but is not required.
