the transaction.

File Type PDF Learning Php Data Objects A Transactions - Beginners Learning PHP Guide To Php Data Objects

Procedural programming is about writing procedures or functions that perform operations on the data, while object-oriented programming is

File Type PDF

Learning Php

about creating A

objects that

contain both

data and

functions.

Object-oriented

programming has

several

advantages over

procedural

programming: OOP

is faster and

easier to

execute; OOP

File Type PDF

Learning Php

provides a clear structure for the programs; OOP helps to keep the PHP code DRY "Don't Repeat Yourself", and makes the code easier to maintain, modify and debug

PHP – Objects A Tutorialspoint

This book is targeted for PHP developers that are moving to PHP Data Objects (PDO) introduced in PHP 5. If you have limited experience with Object Oriented Programming (OOP), the book

File Type PDF

Learning Php

includes an

appendix with

almost 20 pages

of OOP

instruction with

lot of PDO

examples. If you

don't need the

OOP lesson,

there are 154

pages dedicated

to PDO.

Learning PHP

If you've ever worked on a LAMP server, you must

know how tedious

it is to go

through the

results of an

SQL query, and

to manage the connection--even

worse, if you

happen to change

database, your

File Type PDF

Learning Php

work is pretty

much lost:

PostgreSQL,

MySQL and SQLite

don't have the

same driver nor

functions!

Book review:

Learning PHP

Data Objects by

Dennis Poppel

by Anuj Kumar

PDO (PHP Data

File Type PDF

Learning Php

Objects) is a PHP extension through which we can access and work with databases.

Though PDO is similar in many aspects to

mySQLi, it is better to work

with for the following

reasons: It is

File Type PDF

Learning Php

better protected
against hackers.

php data object

facilitate their interoperability, usually in the context of online learning management systems (LMS).

**Learning object metadata –
Wikipedia**

As we have already discussed in

File Type PDF

Learning Php

Chapter 2, the PDOStatement::rowCount() method does not return the correct number of rows in a query. (It returns zero for both MySQL and SQLite.) The reason for such behavior is that the database management

File Type PDF

Learning Php

systems do not

actually know

this number

until the last

row of the query

has been

returned.
