Since the start of the Trump era, the United States and the Western world has finally begun to wake up to the threat of online warfare and the attacks from Russia. The question no one seems to be able to answer is: what can the West do about it? Central and Eastern European states, however, have been aware of the threat for years. Nina Jankowicz has advised these governments on the front lines of the information war. The lessons she learnt from that fight, and from her attempts to get US congress to act, make for essential reading. How to Lose the Information War takes the reader on a journey through five Western governments' responses to Russian information warfare tactics - all of which have failed. She journeys into the campaigns the Russian operatives run, and shows how we can better understand the motivations behind these attacks and how to beat them. Above all, this book shows what is at stake: the future of civil discourse and democracy, and the value of truth itself.

Touring on a motorcycle has never been more popular than it is today, but with more and more people hitting the open road, a growing number are doing so without the proper skills and information they need to survive the ordeal. Far too often the trip of a lifetime turns into an unmitigated disaster, leading to expensive breakdowns, arrests, lost wages, broken limbs, death, and even, on more than one occasion, divorce. Most people who travel aboard motorcycles have learned these lessons the hard way, if they've survived long enough, but now readers of the Motorcycle Touring Bible can learn an easier way; they can learn from author Fred Rau's mistakes rather than through the school of hard knocks.

An analysis of the invasion of our personal lives by logo-promoting, powerful corporations combines muckraking journalism with contemporary memoir to discuss current consumer culture

The bestselling author of No Logo shows how the global "free market" has exploited crises and shock for three decades, from Chile to Iraq In her groundbreaking reporting over the past few years, Naomi Klein introduced the term "disaster capitalism." Whether covering Baghdad after the U.S. occupation, Sri Lanka in the wake of the tsunami, or New Orleans post-Katrina, she witnessed something remarkably similar. People still reeling from catastrophe were being hit again, this time with economic "shock treatment," losing their land and homes to rapid-fire corporate makeovers. The Shock Doctrine retells the story of the most dominant ideology of our time, Milton Friedman's free market economic revolution. In contrast to the popular myth of this movement's peaceful global victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization combined with the privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war, the disaster capitalism complex now exists as a booming new economy, and is the violent culmination of a radical economic project that has been incubating for fifty years.
