In 2001, the Forest Service, U.S. Department of Agriculture (USDA), through its Virtual Center for Reforestation, Nurseries, and Genetics Resources (RNGR), invited Native Americans from across the United States to attend the Western Forest and Conservation Nursery Association annual meeting. About 25 tribal members, representing 20 tribes, attended the meeting at Fort Lewis College in Durango, Colorado. The following year, a similar meeting was held in Olympia, Washington, and tribal members initiated a Tribal

Nursery Council and requested that RNGR facilitate the organization. During 2003, RNGR requested information from 560 tribes across the United States, seeking specific information on tribes' needs for native plants, facilities, training, and so on. Results from the responding 77 tribes were incorporated into the Tribal Nursery Needs Assessment. Based on the results of that questionnaire, and input from tribal members attending the 2003 Intertribal Nursery Council meeting in Coeur d'Alene, Idaho, it was agreed that a nursery handbook was needed. That fall, planning began for writing the manual, loosely based on Agriculture Handbook 674, The Container Tree Nursery Manual, but with special attention to the uniqueness of Native American cultures.

Landscape Irrigation Design provides information and approaches to assist the successful irrigation designer. Beginning with basic concepts, the text discusses the soil, plants, water and their interactions, sprinkler selection and spacing, water supply and distribution, controllers, electrical wiring, pumps and pump selection, and drip irrigation and ends with completed irrigation designs. Although the focus is on residential irrigation design, larger designs such as golf courses are also discussed. Careful presentation of a wealth of resource material allows this work to serve as both an introductory text as well as an independent learning aid and makes Landscape Irrigation Design a valuable reference for first and subsequent design projects.
