Jason Bourne is one of the most popular and compelling characters in modern fiction. Originally created by bestselling author Robert Ludlum, now New York Times bestselling writer Eric Van Lustbader carries on Ludlum's legacy with a new novel about the rogue secret agent who has lost his memory . . . Jason Bourne has been pursued by powerful governments--and escaped. Hunted by the most skilled assassins in the world--and outsmarted them. Targeted by terrorists--and defeated their plans for global chaos. But now, Bourne wants only one thing: retribution. THE BOURNE RETRIBUTION Bourne's friend Eli Yadin, head of Mossad, learns that Ouyang Jidan, a senior member of China's Politburo, and a major Mexican drug lord may have been trafficking in something far more deadly than drugs. Yadin needs Bourne to investigate. Bourne agrees, but only because he has a personal agenda: Ouyang Jidan is the man who ordered Rebeka--one of the only people Bourne has ever truly cared about--murdered. Bourne is determined to avenge her death, but in the process

he becomes enmeshed in a monstrous world-wide scheme involving the Chinese, Mexicans, and Russians. Bourne's increasingly desperate search for Ouyang takes him from Tel Aviv to Shanghai, Mexico City, and, ultimately, a village on China's coast where a clever trap has been laid for him. Bourne finds himself pursued on all sides and unsure whom he can trust. As he moves closer to Ouyang, closer to avenging the woman he loved, he also moves ever closer to his own death . . .

Chapter 1 With the shift from “human resources” to “human capital management” (HCM), public agencies are striving to strategically manage their workforces. Sally Selden’s groundbreaking book moves far beyond describing best practices and offers the context in

which innovative practices have been implemented. She details how agencies are creating performance-aligned workforces by adopting systems and policies that are driven by their strategic missions. This book covers core topics of personnel courses—including hiring, training, retention, performance, and recognition—but also includes integrated coverage on measuring success through assessment. Further helping readers grasp how HCM works, the book uses original data from the Government Performance Project and incorporates many comparative examples across a wide range of states, plus federal and municipal agencies. Unlike anything else available, Human Capital fills a critical gap for both students and public personnel professionals.

Musculoskeletal Infections investigates the occurrence, progression, severity and clinical prognosis of various soft tissue, bone and joint infections. It explores treatments such as muscle flaps, antibiotics and breakthroughs in adjunctive and gene therapy. It also covers procedures to classify disease stages, identify malevolent organisms, modify host conditions, and select the most appropriate therapeutic regimen.

Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be

seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the bitingly satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.
