The Terran military, the Astral Force, launches a mission to crush a colonial rebellion on the colony of Cerberus. The results of that mission ripple across the planets of the Centauria, and place the entire system on the brink of war. Lieutenant Katja Emmes is a platoon commander, leader of the 10-trooper strike team aboard the fast-attack craft Rapier. Although fully trained, she has never led troops in real operations before, and lives in the shadow of her war-hero father. Sublieutenant Jack Mallory is fresh out of pilot school, daydreaming about a fighter pilot position in the space fleet and in for a rude awakening. Lieutenant Commander Thomas Kane uses a six-month deployment in command of Rapier to secure his rise to stardom within the military. As violence erupts, each will be tested as never before. How they respond may decide the fate of Terra, and Earth.

NATIONAL BESTSELLER “Steven Pressfield brings the battle of Thermopylae to brilliant life.” Pat Conroy At Thermopylae, a rocky mountain pass in northern Greece, the feared and admired Spartan soldiers stood three hundred strong. Theirs was a suicide mission, to hold the pass against the invading millions of the mighty Persian army. Day after bloody day they withstood the terrible onslaught, buying time for the Greeks to rally their forces. Born into a cult of spiritual courage, physical endurance, and unmatched battle skill, the Spartans would be remembered for the greatest military stand in history—one that would not end until the rocks were awash with blood, leaving only one gravely injured Spartan squire to tell the tale. . . .

A renowned philosopher challenges long-held views on just wars, ethical conduct during war, why wars occur, how they alter people and societies, and more For residents of the twenty-first century, a vision of a future without warfare is almost inconceivable. Though wars are terrible and destructive, they also seem unavoidable. In this original and deeply considered book, A. C. Grayling examines, tests, and challenges the concept of war. He proposes that a deeper, more accurate understanding of war may enable us to reduce its frequency, mitigate its horrors, and lessen the burden of its consequences. Grayling explores the long, tragic history of war and how warfare has changed in response to technological advances. He probes much-debated theories concerning the causes of war and considers positive changes that may result from war. How might these results be achieved without violence? In a profoundly wise conclusion, the author envisions “just war theory” in new moral terms, taking into account the lessons of World War II and the Holocaust and laying down ethical principles for going to war and for conduct during war.

Successful democracies rely on an active citizenry. They require citizens to participate by voting, serving on juries, and running for office. But what happens when those citizens purposefully opt out of politics? Exit—the act of leaving—is often thought of as purely instinctual, a part of the human "fight or flight" response, or, alternatively, motivated by an antiparticipatory, self-centered impulse. However, in this eye-opening book, Jennet Kirkpatrick argues that the concept of exit deserves closer scrutiny. She names and examines several examples of political withdrawal, from Thoreau decamping to Walden to slaves fleeing to the North before the Civil War. In doing so, Kirkpatrick not only explores what happens when people make the decision to remove themselves but also expands our understanding of exit as a political act, illustrating how political systems change in the aftermath of actual or threatened departure. Moreover, she reframes the decision to refuse to play along—whether as a fugitive slave, a dissident who is exiled but whose influence remains, or a government in exile—as one that shapes political discourse, historically and today.
