This book looks at the industrial policies of Southeast Asian economies in their motor vehicle industries from early import substitution to policy-making under the more liberalised WTO policy regime. The book examines how inward automotive investment, especially from Japan, has been affected by policies, and how such investment has promoted industrial development in the late-industrialising economies within ASEAN (Association of Southeast Asian Nations). It provides insights into the automotive industry of Southeast Asia in terms of production volumes, sales volumes, market structure, and trade. Through country case studies, the book is a useful reference and illustrates how industrial policies in Southeast Asia have affected the spread of automotive development in the region. It will appeal to policy-makers and

went into labour with him - on a transatlantic flight - Alan Croghan's life was chaotic. As a young boy in north Dublin, he drank, took drugs and rarely attended school. What he loved best was stealing cars, driving them around, and swapping parts with his fellow thieves. By the age of sixteen he had accumulated thirty-five criminal convictions - and yet he'd never been locked up. Fearing that his friends suspected he was a police informer, he contrived to get himself imprisoned. *Wild Child* - published in trade paperback as *Disorganised Crime* - is the story of this troubled young boy, and of the man he became - a criminal and alcoholic who eventually had the strength and courage to get sober and go straight. 5th centuries CE using categorical markers from South Asian intellectual history. Buddhist traditions were just as concerned as Hindu traditions with meditative disciplines of yoga. By exploring the intertextuality of the Patanjalyogasastra with texts such as Vasubandhu's Abhidharmakosabhasya and Asanga's Yogacarabhumisastra, this book highlights and clarifies many ideologically Buddhist concepts and practices in Patanjala yoga. Karen O'Brien-Kop demonstrates that 'classical yoga' was co-constructed systemically by both Hindu and Buddhist thinkers who were drawing on the same conceptual metaphors of the period. This analysis demystifies early yoga-meditation as a timeless 'classical' practice and locates it in a specific material context of agrarian and urban economies.
