The "conventional" volt, V 90, defined in 1987 by the 18th General Conference on Weights and Measures and in use from 1990, is implemented using the Josephson effect for exact frequency-to-voltage conversion, combined with the caesium frequency standard. For the Josephson constant, $K_J = 2e/h$ (where e is the elementary charge and h is the Planck constant), a "conventional" value $K_J-90 = 0 ...$
